## HP USB-C G5 Essential Dock (72C71AA)

Aktiv ab: 23.09.2022

### Überblick

Have everything you need to get the job done with this compact dock that keeps your desk clean. With a single USB-C® cable,<sup>1</sup> open your ports to all your accessories, connect up to three high-res displays,<sup>2</sup> stable ethernet connection, and so much more...all while charging your laptop.<sup>1</sup> Clear your desk and clear your mind with this HP USB-C G5 Essential Dock.

### Seamless Productivity

Effortlessly go the extra mile with just a single USB-C® cable.<sup>1</sup> This essential dock seamlessly powers and supports 4 USB-A ports for all your accessories, up to 3 high-res displays,<sup>2</sup> and stable ethernet connection—all while delivering 65W of power to your laptop.

### More Ports, Less Constraints

This essential dock is designed to work with what you're working with. It's compatible with most USB-C® or Thunderbolt™ enabled PCs,<sup>1</sup> and its various ports open the way to all your accessories.

### Simple Setup. Essential Manageability.

Just plug in the dock and get down to business. It's simple to stay up to date with essential manageability features<sup>1</sup> including connected firmware updates,<sup>3</sup> PXE boot,<sup>4</sup> and LAN/WLAN switching.

### Compact Meets Impact

Reclaim your desk and clear the clutter with a compact dock that takes up less than 5 x 5 inches of space. With a single cable connection, less is more.

## Überblick

- 1 For USB-C® alt mode functionality, host PC must support the DisplayPort™ Alt mode protocol through its USB-C® or Thunderbolt™ port. Charging and port replication is supported on notebooks that have implemented USB-C® Alt Mode industry specifications. Power button to turn on or wake the system only functions on HP or HP supported notebooks. PXE Boot functionality will depend on whether the host systems firmware has the EFI driver available. This dock does not support Wake-On-LAN functionality nor MAC Address Pass Through. Connected firmware updates will require the end user to sit through the firmware update process until completed. HP does not provide ethernet and audio drivers on Mac PCs. Not all features work on all OS's or all HP or Non-HP devices.
- 2 Video resolution and support is dependent on the maximum capability of the notebook. Supports 3 x FHD @ 60Hz or 2 x QHD @ 60Hz with DisplayPort 1.4 machine. For 3 x QHD @ 60Hz or 3 x 4K @ 60Hz configurations, the machine must support DisplayPort 1.4 with Display Stream Compression. If the machine does not support Display Stream Compression, then the system must support DisplayPort 1.4 with high-res mode enabled in the system.
- 3 Your docking station is not useable while updating.
- 4 PXE boot functionality will depend on whether the host systems firmware has the EFI driver available.
